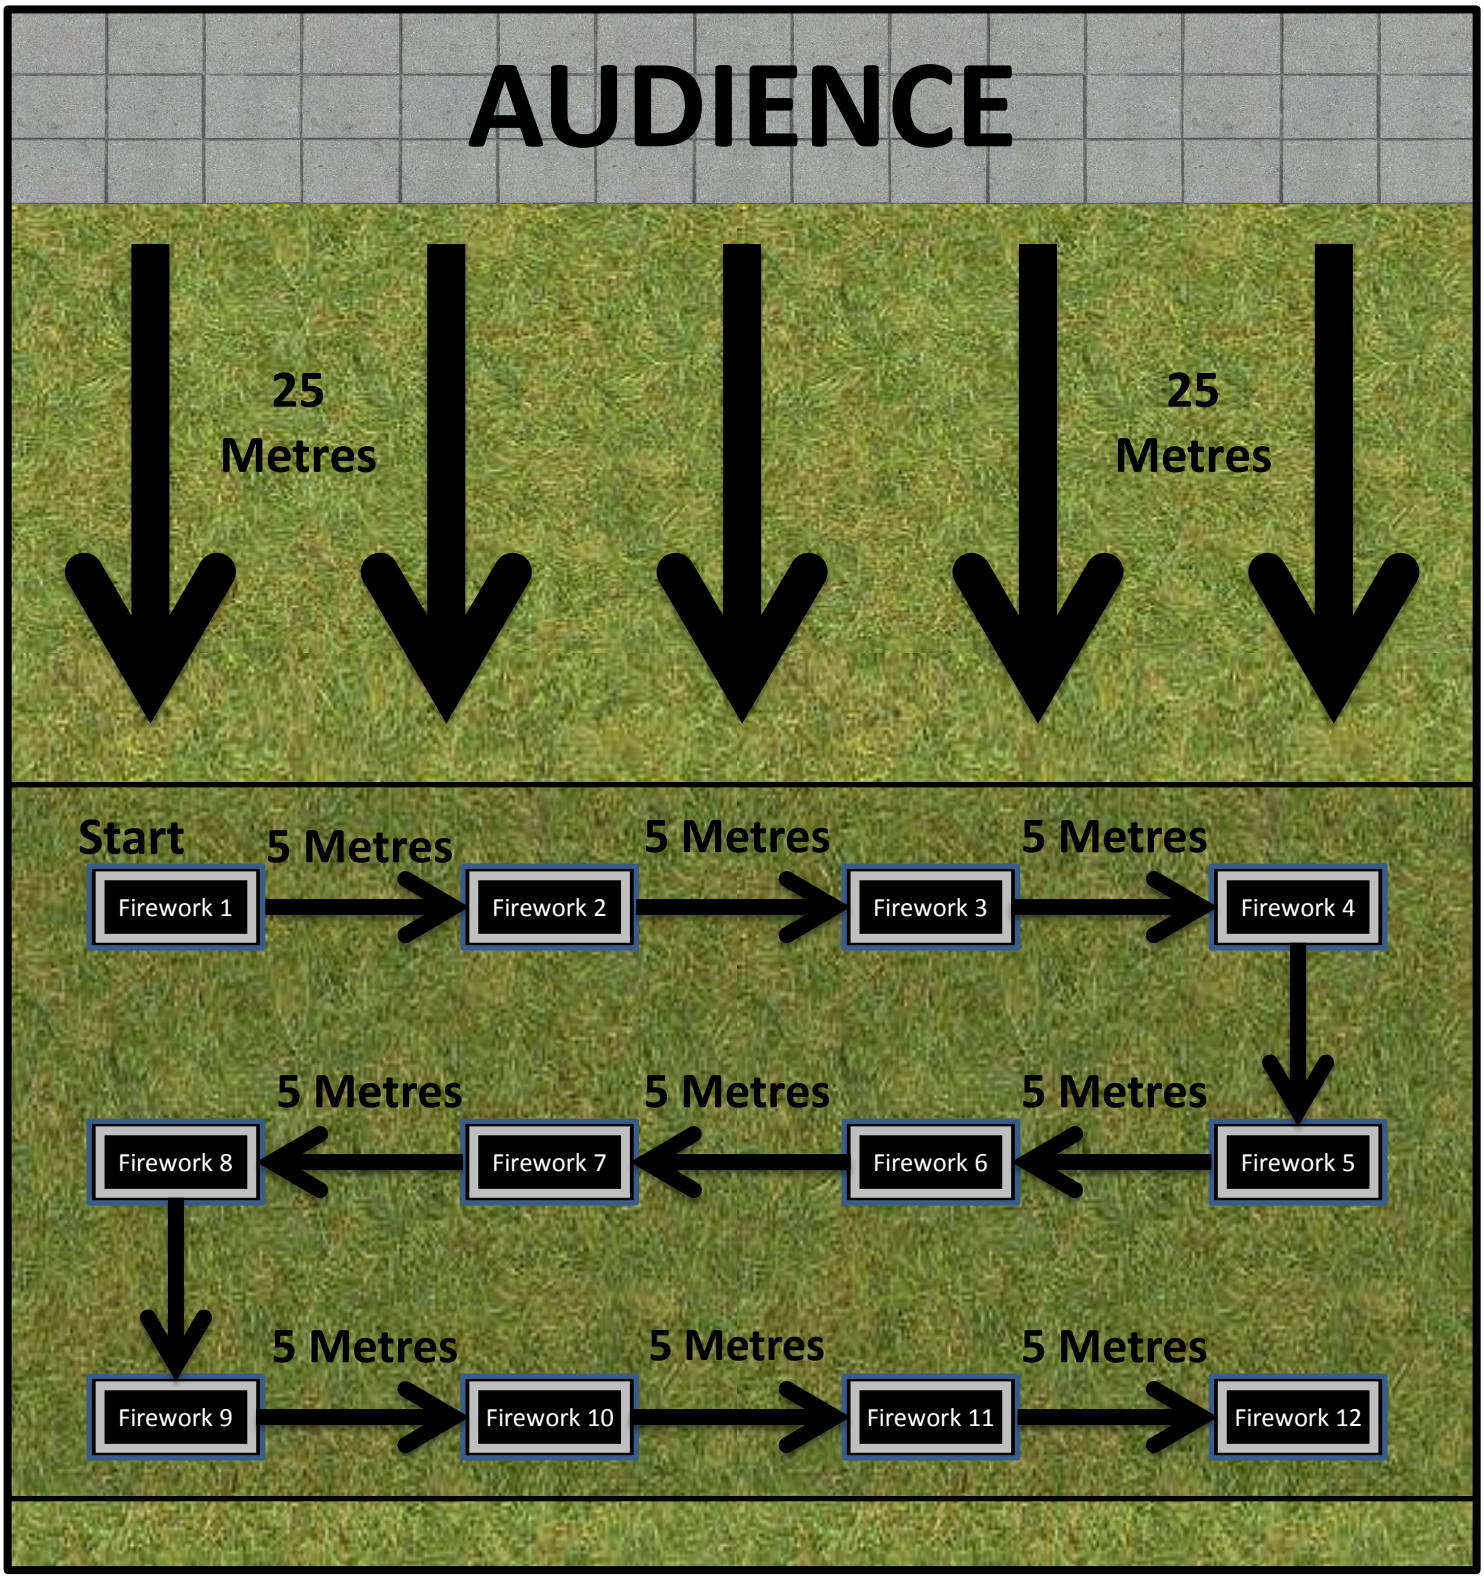
Building Your Own Display

Got all of your fireworks? We'll show you have to setup your display to amaze your audience. We highly recommend that you print this for ease and reference when it comes to preparing you special night:



Instructions

- Check the weather in advance to make sure it doesn’t rain on your parade. (If it will rain, read further down for details.)
- You need to find a nice dry area away from anything that could be damaged or hazardous during your display (i.e. trees).
- Make sure your at least 25 metres away from where your audience will be located.
- Plan which order you would like to fire your fireworks, and begin to mark out following the plan above.
- Using the guide above to determine the distance between each firework, separate each one leaving plenty of space. We have used 5 metre gaps as an example, the distance is purely down to you.
- Ensure all fireworks are secured and are at no risk of falling over. We recommend using bricks or stakes around each product using tape if necessary.
- Expose all of the fuses ready to light.
- Put on all safety equipment that you own such as safety goggles, helmet, gloves and a high vis jacket (all highly recommended).
- That’s it! Your ready to start the show! Make sure to follow the sequence that you planned starting with number 1. Please also follow the firework code shown below.

In the event of rain

- In the event of rain, make sure that each firework is well covered with a removable plastic bag. We recommend using black bags.

The Firework Code:

- Stand well back
- Keep pets indoors
- Keep fireworks in a closed box
- Only buy fireworks marked CE
- Light at arm's length, using a taper
- Follow the instructions on each firework
- Never give sparklers to a child under five
- Don't drink alcohol if setting off fireworks
- Always supervise children around fireworks
- Light sparklers one at a time and wear gloves
- Never put fireworks in your pocket or throw them
- Never go near a firework that has been lit - even if it hasn't gone off it could still explode
